Theft prevention tip for iPhone Users:

Due to their simple identification, the white "Ear Buds" that came with an iPhone make it easy for thieves to determine that you have an iPhone, even if your iPhone is hidden in your pocket. To make it more difficult for the crooks, you may want to use earphones of a different color. Let's make it difficult for these thieves!

LOCATE YOUR LOST OR STOLEN SMARTPHONE

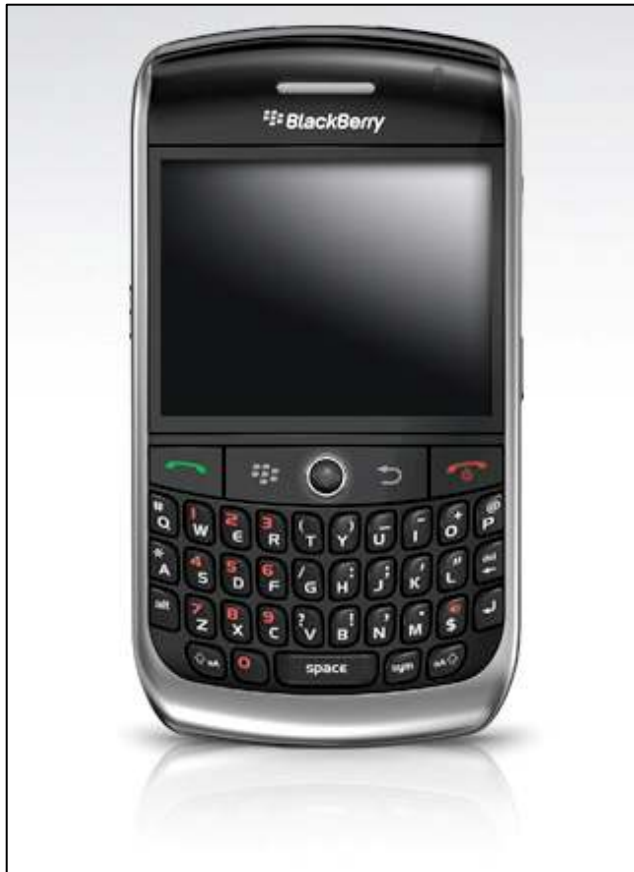

In the age of technology, Smartphones are being stolen more than ever. Many times these Smartphones are taken by force and/or fear, raising the crime of theft to the level of a robbery, a felony crime. Sometimes, these Smartphones are taken during burglaries from cars or homes. Apprehending these suspects and returning these phones to their rightful owners is difficult. The instructions in this pamphlet can help you get your phone back if it is ever lost or stolen.

Fortunately, most newer phones, such as **Apple's iPhone**, **Blackberries** and cell phones utilizing the **Droid** operating systems, have built in Global Positioning System (GPS) technology which makes it simple to locate them if they are lost or stolen.

Locating these Smartphones requires that the telephone owner download a free or low cost application to their Smartphone and activate the software. The below listed software can be downloaded directly to your Smartphones from the regularly accessed software markets associated with each system.

Type of Smartphone or Operating System	Name of Application	Price
iPhone – Apple	Find My iPhone	Free
Droid Operating System	LocateMyDroid	Free
Blackberry	Find My Phone	\$2.99
Blackberry	Wheres My Phone Pro	\$3.99

Further discussion and features of each application can be found below and at the websites noted.

iPhones
